06/09/21	Waguespack, Neil	<p>On the topic of the lock out tag out for the valves, that SOP is lacking in my opinion. There is no mean in that SOP to advise the employees on the type of valves, size of the valves etc. that has just been manipulated. As an example, the operating formula for opening / closing a gate valve is 3 x the nominal valve size plus 2 or 3 turns of the operating nut. A 6 in gate valve would require 6 x 3 = 18 turns plus 2 or 3 turns for a total of 20-21 turns.</p> <p>Without this information there is no way for the workers to know if they fully opened or closed the valve, and in the event of partial opens or closes there is no way to remedy that the valve has been returned to it's original position before actuation.</p>	Not a Public Records Request	0
06/09/21	Waguespack, Neil	So now if you have SCADA where does it transmit to, and who does it notify in the event of alarms and triggers	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	What data points are being logged on these wells?	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	Is the information directly from the SCADA system going to be uploaded to the website?	Not a Public Records Request	0

2021 PUBLIC RECORDS REQUESTS

Date	Requestor	Records Requested	Disposition	Pages Reproduced
06/09/21	Waguespack, Neil	Was Scada also installed on Meadow Lakes well? Meadow Lakes is lumped in to our permit, but until now have gone largely unmentioned, however I am certain that the Meadow Lakes system is in dire need of SCADA as well.	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	The item that I did not see in the Owens contract was remapping, over the years the MRT on Military may have been the MRT but through developments and housing expansions I am confident that the MRT utilized right now is NOT accurate and reflective of the water quality on the other side of the system in subdivisions like the Landings and the Bluffs. This needs to be taken into consideration and quite frankly multiple MRTs tested on a rotating test schedule at a minimum. There is no way to know what is going on in the system testing 2 points of entry and 1 x MRT daily. If it is truly about water quality and safety the MRT currently being tested is inadequate and not representative of the system. TCR 5,6, or 8 are more appropriate. Attached image.	Referral to Other Public Entity (LDH); No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	Is the flow meter logging the flow over time?	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	Is the flow tied into the CL pump to influence dosing?	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	Is the plan to set the total CL dose to that specified by TMB in the Chloramination report from 2018 specific to each well and included in the "Letter of No Objection" Chloramine permit? From that report, Steele Rd = 2.7 ppm Willowwood = 3.0 ppm and Meadow Lakes = 2.7ppm?	Referral to Thornton Musso; No Response to Request for Clarification	0

2021 PUBLIC RECORDS REQUESTS

Date	Requestor	Records Requested	Disposition	Pages Reproduced
06/09/21	Waguespack, Neil	Lock out / tag out policy for valves was implemented (Please send me a copy of the policy that was finalized)	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	You referenced SCADA and control system installation on both wells was to be completed by 5/21 to include: (Please demonstrate that these systems were installed and are now fully functional, reporting, and alerting on our system)	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	You mentioned that on May 5th employees underwent webpage training, yet the last water testing information posted was on 4/30/21 to the website. Why is that?	Not a Public Records Request	0
06/09/21	Waguespack, Neil	On May 13th you mentioned new flow meters installed at both wells, the first at Steele Rd to replace the broken meter that was cited in the Sanitary survey and the second to Willowood as an upgrade. (Please demonstrate that these systems were installed and are now functional on our system, logging data and interlocked to the chemical dosing pumps as required by NOV back then)	No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	With the separation of Environmental Services and TU referenced in your discussion, please name and demonstrate that the operators in charge of the day to day operations of our wells and responsible for call out when there is a problem possess the appropriate certification class of license and that they are truly familiar with the day to day operations of our system as is the required by State law.	Referral to STPG Website; No Response to Request for Clarification	0
06/09/21	Waguespack, Neil	I would also appreciate a copy of the preliminary findings of Owens and White from their 5/13 site visit and any subsequent site visits and meeting notes.	No Response to Request for Clarification	0
