

Faubourg Coquille Water System Water Main Flushing

Tammany Utilities will be flushing the Faubourg Coquille Water System from February 8th to February 12th. The flushing is anticipated to follow the schedule below, but is subject to change due to weather or other unforeseen circumstances. Tammany Utilities customers living in these areas can expect to experience low water pressure when flushing is initiated. If you are not a Tammany Utilities customer or if you do not live in one of the subdivisions/areas identified below, this notice does not apply.

Tammany Utilities flushes the water mains periodically to:

- Maintain good quality water. Over time, naturally occurring minerals accumulate on the interior of our pipes. Flushing scours the pipe and removes these deposits.
- Provide required fire flow data to the Fire Department. While flushing, Tammany Utilities personnel measure and record the fire flow data at each hydrant. This data is then given to the Fire Department who then uses the data to calculate fire insurance ratings for the area.
- Ensure that all fire hydrants are in good working order.

We appreciate your understanding and apologize for the inconvenience this maintenance causes.
